

INNOVATIVE SYSTEM FOR FIREPLACE CONSTRUCTION

ECOLOGY AND SUSTAINABLE DEVELOPMENT

COMFORT OF USE IN HARMONY WITH NATURE

Healthy heat – heating not only by convection but mainly by radiation, the most natural and human-friendly form.

Clean air – smooth, non-dusting surface in the fireplace chamber prevents dust accumulation and circulation (ideal for allergy sufferers).

Highest safety – A1 class means complete non-combustibility, ensuring the highest fire protection standard.

Eco-responsibility – non-toxic product, free from contaminants, made from over 50% recycled materials.

PRICELIST 2026

valid from March 30, 2026

Suggested net retail prices

 **stabica LC 600**
30mm or 40mm radiant fireplace panels

 **stabica Support**
30mm reinforcing strip

 **stabica Izol**
30mm insulating panel

 **stabica Mortar**
bonding and reinforcing mortar

 **stabica LC HT Primer**
high-temperature priming compound

 **stabica LC HT Glue**
quick-acting adhesive

 **stabica Finish**
cement-lime putty

 **stabica Fix**
screws for fireplace panels

 **stabica Mesh**
reinforcing mesh

 **stabica TDM**
mounting plugs TDM

EASE OF PROCESSING

Dust-free installation – the material does not produce dust during cutting and processing, improving working comfort indoors.

Dimensional precision – low tolerance ensures perfect fitting and faster installation.

Lightweight and durable – optimal density (670 kg/m³) ensures low weight while maintaining high compressive (>7 MPa) and bending strength (>2 MPa).

Standard tools – installation does not require specialized equipment; basic carpentry and plastering tools are sufficient.
